Trojan Trading

SUBJECT: Application for Technical Project Manager at Trojan Trading

Dear Trojan Trading Hiring Team,

I am writing to express my strong interest in the Technical Project Manager position at Trojan Trading, as advertised on LinkedIn. With over 10 years of experience leading engineering teams in fast-paced, high-volume transactional environments, I am confident in my ability to drive project delivery and contribute to your mission of revolutionizing the crypto trading landscape.

Throughout my career, I have specialized in bridging technical expertise with project leadership. My background includes managing the full software development lifecycle for complex platforms in finance and e-commerce, such as launching mobile banking features for Banco de Chile and enhancing high-traffic retail sites for Dick's Sporting Goods. These experiences have honed my ability to manage ambitious deadlines, resolve technical blockers, and ensure smooth collaboration between engineering and leadership teams.

I am an expert in implementing and optimizing Agile frameworks, including Scrum and Kanban, to boost team velocity and ensure clear, achievable priorities. My technical foundation allows me to effectively scope tasks and validate the feasibility of project plans, ensuring efficient workflows and successful outcomes.

The opportunity to apply my skills to a cutting-edge DeFi product like Trojan is incredibly exciting. I am a proactive problem-solver with a genuine interest in trading technology and am eager to contribute to a lean, innovative team that is setting new standards in the market.

Thank you for your time and consideration. I look forward to discussing how my experience can help Trojan Trading continue its impressive growth.

Sincerely,
Juan Garcia
