Hiring Team

Company Confidential

SUBJECT: Application for Technical Project Manager (EHR Implementation) at Company Confidential

Dear Hiring Team,

I am writing to express my keen interest in the Technical Project Manager contract position for the Core360 EHR implementation, as advertised on LinkedIn. With over 10 years of experience leading complex IT projects, particularly within the healthcare sector, I am confident in my ability to guide this critical transformation to a successful go-live.

My background includes extensive leadership of full project lifecycles, from kickoff and planning to execution and UAT coordination, for large-scale system implementations. In previous roles, I have managed EHR-related projects involving medical imaging (DICOM), patient data integrations using HL7 standards, and developing systems that directly support healthcare professionals. My expertise aligns directly with your requirements for EHR implementation leadership and strong familiarity with UAT, QA, and documentation workflows.

I am an expert in Agile and hybrid methodologies and proficient with tools like JIRA, Confluence, and MS Teams, which will allow me to seamlessly integrate with your Enterprise PMO standards and processes. I am passionate about leveraging technology to improve care delivery and am eager to bring my adaptive project management approach to ensure this implementation is delivered on time and meets all stakeholder goals.

Thank you for your time and consideration. I look forward to discussing how my experience can benefit your organization.

Sincerely,
Juan Garcia
