STEPS Talent

SUBJECT: Application for Senior Scrum Master – Security Program

Dear Srishti Singh Patel,

I am writing to express my strong interest in the Senior Scrum Master role for the Security Program, which I discovered on LinkedIn. As a certified SAFe Agilist and Advanced Scrum Master with over 10 years of experience leading complex, mission-critical programs, my background aligns directly with the requirements of this position for your client.

My career has been dedicated to scaling Agile delivery and enhancing team performance across diverse industries, including Financial Services, Public Safety, and Cloud Technology. At Globant, I led SAFe PI Planning and managed up to five concurrent scrum teams for clients like Banco de Chile and Royal Caribbean, consistently improving delivery velocity and achieving key business outcomes.

I am highly proficient in using Jira and Confluence to track and report on crucial Agile metrics, including velocity, capacity, and burnup/burndown charts, to ensure transparent communication and data-driven decision-making. My experience includes managing an AWS cloud-based media platform and leading the development of a security-focused bodycam system for law enforcement, which directly relates to the program's Security and Cloud domains.

I am confident that my adaptive approach and expertise in removing impediments, coaching Product Owners, and fostering collaboration with leadership make me an ideal candidate to drive the success of this high-impact Security Program. Thank you for your time and consideration. I look forward to discussing how my skills can benefit your client.
