Hiring Manager
Thermo Fisher Scientific

SUBJECT: Application for Systematic Literature Review Project Manager (RA III) at Thermo Fisher Scientific

Dear Hiring Manager, I am writing to express my keen interest in the Systematic Literature Review Project Manager position at Thermo Fisher Scientific, as advertised on LinkedIn. My 10+ years of experience in managing complex, data-intensive projects, particularly within the healthcare sector, aligns well with the requirements of this role and your company's mission to serve science. A recurring challenge in my project work has been the need to translate complex requirements from diverse stakeholders into structured, actionable plans with clear, measurable outcomes.

In a recent project for Banco de Chile, I led the end-to-end implementation of a new data warehouse and Power BI analytics platform. This involved defining the project scope, managing a large cross-functional team, and overseeing the budget and timeline. The action resulted in a fully functional data analytics solution that provided stakeholders with streamlined access to critical business insights, enhancing their strategic decision-making capabilities.

Similarly, when managing the delivery of an AI-powered chatbot for Royal Caribbean, I successfully guided the project from the initial proposal and discovery phase to production release. I coordinated with technical and product teams to synthesize user needs into technical specifications, planned and executed the project within a fixed-price model, and managed all client communications. The result was an on-time delivery that significantly improved guest service efficiency and digital engagement.

The opportunity to apply my adaptive project management discipline, client relations experience, and background in data analysis to the vital field of health services research is incredibly appealing. I am confident that my ability to manage project lifecycles, budgets, and stakeholder communications can bring significant value to Evidera's research initiatives.

Sincerely,

Sebastian Ochoa Alvarez
