Hiring Manager

Black & Veatch

SUBJECT: Application for Project Engineering Manager at Black & Veatch

Dear Hiring Manager,

I am writing to express my strong interest in the Project Engineering Manager position at Black & Veatch, as advertised on LinkedIn. I was particularly drawn to your Technology, Commercial & Industrial team's focus on advanced manufacturing, generative AI computing, and distributed infrastructure, as it aligns directly with my professional experience in leading complex technology projects.

With over 11 years of experience as an adaptive Technical Project Manager, I have a comprehensive background in guiding large, cross-functional teams through the end-to-end delivery of multifaceted technology and infrastructure initiatives. My expertise lies in managing project constraints—including budget, schedule, and technical output—to successfully execute projects involving cloud infrastructure (AWS, GCP), AI-driven solutions, and large-scale system integrations for global clients in diverse industries.

My background includes direct responsibility for interfacing with clients on technical requirements, managing project changes, and supporting business development through RFP analysis and proposal creation. I am adept at ensuring all work complies with rigorous quality programs and engineering standards while fostering a culture of continuous improvement.

I am confident that my extensive project management skills and my experience with the core technologies your team utilizes would allow me to make a significant contribution to Black & Veatch. I am eager to discuss how my background in delivering innovative infrastructure and AI projects can support your mission.

Sincerely,

Sebastian Ochoa Alvarez
