Hiring Team

Siemens Energy

SUBJECT: Application for Project Manager - Nuclear Generator Major Projects at Siemens Energy

Dear Siemens Energy Hiring Team,

I am writing to express my keen interest in the Project Manager - Nuclear Generator Major Projects position at your Orlando, FL location, as advertised on LinkedIn. With a background in Systems Engineering and over 10 years of experience leading complex, high-value technical projects, I am confident in my ability to manage the entire project lifecycle as described in the job description.

My career has been focused on the cradle-to-grave execution of multifaceted projects that involve significant engineering, hardware integration, and software development components. I have a strong record of serving as the primary liaison between customers and internal stakeholders, ensuring clear communication, managing project financials, and upholding rigorous quality and risk management standards. My experience leading the deployment of integrated hardware systems for government contracts has prepared me to manage projects with strict technical specifications and compliance requirements.

I am adept at working with procurement partners, managing contract deliverables, and ensuring all engineering and hardware milestones are met. I am eager to apply my adaptive project management approach and technical leadership skills to contribute to Siemens Energy's mission of developing the energy systems of the future. I am a certified Project Management professional and I am excited by the opportunity to undertake IPMA certification to further align my skills with your standards.

Thank you for considering my application. I look forward to the possibility of discussing how my experience can benefit your team.

Sincerely,

Andres Perez
