Alex Theakston

DataX Connect

**SUBJECT:** Application for Commissioning Project Manager- Data Centers

Dear Alex Theakston,

I am writing to express my keen interest in the Commissioning Project Manager- Data Centers role I discovered on LinkedIn. The opportunity to contribute to a growing commissioning company dedicated to making an impact in the mission-critical sector strongly aligns with my professional goals.

With over 10 years of comprehensive project management experience, I have a substantial background in overseeing complex technical projects from conception through to post-deployment support. My experience includes leading a large-scale data center migration from on-premise infrastructure to Google Cloud Platform, where I managed multidisciplinary teams and ensured a seamless transition with minimal downtime. This project provided me with direct experience in the intricacies of data center operations and infrastructure projects.

Furthermore, my background includes extensive hands-on management of hardware and software integrations, including the deployment of physical access control systems, biometrics, and CCTV across more than 60 sites. I am adept at managing diverse internal and external stakeholders—including vendors, technical teams, and C-level executives—and implementing rigorous QA/QC programs to ensure project deliverables meet precise technical specifications.

My Project Management certifications and adaptive approach to managing timelines, budgets, and risks have been central to my success. I am confident that my skills in infrastructure management and large-scale project execution are highly transferable to the responsibilities of this role. I am eager for the opportunity to discuss how my experience can benefit your client's projects on the East Coast.

Sincerely,

Sebastian Ochoa Alvarez
