Hiring Manager

Walter P Moore

SUBJECT: Application for Forensics Project Manager - Diagnostics at Walter P Moore

Dear Hiring Manager,

I am writing to express my keen interest in the Forensics Project Manager - Diagnostics role at Walter P Moore, as advertised on LinkedIn. My passion for dissecting complex systems and leading projects that restore and enhance critical assets aligns perfectly with the challenges described in the job description.

In my career, I have consistently faced the problem of underperforming systems and the need for meticulous investigation to drive improvements. As a Technical Project Manager at Globant, I took on the challenge of a client's ecommerce platform suffering from poor performance. I led a comprehensive diagnostic effort, analyzing core web vitals and system architecture, and then managed a cross-functional team to execute a targeted renovation. The result was a 40% improvement in platform performance, directly enhancing the user experience and supporting the client's commercial goals.

My experience extends to business development and client acquisition, key requirements for this role. I have a history of analyzing RFPs, crafting winning proposals, and building teams from the ground up to service new contracts, successfully managing projects with budgets exceeding several million dollars. I am adept at managing all contractual and technical production aspects of a project, ensuring delivery aligns with client expectations and strategic objectives.

The opportunity to apply my adaptive project management discipline and diagnostic mindset to the complex structural and infrastructure challenges that Walter P Moore solves is incredibly compelling. I am confident that my skills in project leadership, technical analysis, and client relations would allow me to contribute significantly to the growth and success of your Diagnostics Group.

Sincerely,

Sebastian Ochoa Alvarez
